

Junk Basket

Junk Basket is designed to remove small pieces of junk such as bit cones, [handing tools](#), slips from the bottom of well. Its unique feature is utilizing the principle of reverse fluid circulation. Moreover, it can be used as a special coring tool. During operation, with the steel ball dropped into the valve seat, fluid flow in a continuous stream to the center of the tool and up through return ports in the upper end of the barrel, all junk is thus carried into the barrel above the junk catcher.

LL series Junk Basket are designed to remove small pieces of junk from the bottom of well. Suitable for onshore and offshore fishing operations.
