

## Fishing Spear

Fishing Spear is a melee weapon which can be found near bodies of water. It is available in specific locations, such as near an abandoned tent at the beach and also near in-land water spots. [Fishing Spear](#) can be thrown, and can also be used in a thrusting fashion in all directions. It is a useful alternative to the bow for fishing from land if you wish to preserve arrows. It cannot be used while swimming, however, so it's limited thrusting range from the shoreline can make spearfishing a bit time consuming. Because you can thrust Fishing Spear at a low angle and run at the same time it is very well suited for hunting lizards, rabbits, and birds, unlike weapons like axes which force the player to stop completely while swinging them towards the ground.

LM series Fishing Spear are internal catching tools. Suitable for onshore and offshore fishing operations.

### Details

The LM series fishing spears were developed to provide the market with more reliable technology and more hoisting performance. Spears are internal catching tools, which could be used to catch drill pipes, tubings, washover pipes, liners, packers, water allocators and reverse stuck fishes, or used with others tools. (Such as bumper jars, back off sub, etc.). The block spears are furnished in two types: releasing sliding block spear and releasing two blocks spear. Included but not limited by the advantages mentioned, LM series fishing spears might be your best choice.

### General Features

- Suitable for cold area and desert environment
- Suitable for onshore or offshore operations
- Wide range of selection for different operations

## Main aramaters

Outside Diameter: 2-7/8" – 6-7/8" (73 mm - 175 mm)

### Parameters:

Fishing Spear for Drilling

Type	OD (mm)	Dia. Tap (mm)	Fish OD (mm)	Thread
